PREFACE

Standards for Defence

Specification for

Zinc Air Battery

1.4V, NSN 6135-99-930-5607

- a.** This supplement shall be read in conjunction with Def Stan 61-21.
- b.** This supplement provides a definitive specification for the electrical, physical, performance and nomenclature requirements for a 1.4V Zinc Air battery.
- c.** This supplement has been agreed by the authorities concerned with its use and is intended to be used whenever relevant in all future designs, contracts, orders etc. and whenever practicable by amendment to those already in existence. If any difficulty arises which prevents application of this Defence Standard and its associated supplements, the UK Defence Standardisation (DStan) shall be informed so that a remedy may be sought.
- d.** Any enquiries regarding this standard in relation to an invitation to tender or a contract in which it is incorporated are to be addressed to the responsible technical or supervising authority named in the invitation to tender or contract.
- e.** Compliance with this Defence Standard shall not in itself relieve any person from any legal obligations imposed upon them.
- f.** This standard has been devised solely for the use of the Ministry of Defence (MOD) and its contractors in the execution of contracts for the MOD. To the extent permitted by law, the MOD hereby excludes all liability whatsoever and howsoever arising (including, but without limitation, liability resulting from negligence) for any loss or damage however caused when the standard is used for any other purpose.

TEXT

Standards for Defence

Specification for

Zinc Air Battery

1.4V, NSN 6135-99-930-5607

SECTION 1 GENERAL REQUIREMENTS

0 INTRODUCTION

It is Ministry of Defence (MOD) policy to purchase batteries against performance specifications whenever possible. Defence Standard 61-21 and its series of supplements has been generated to address the current requirements for batteries. This supplement is applicable when invoked directly by a MOD invitation to tender, contract, or when referred to by other MOD battery specifications.

1 SCOPE

This supplement provides a definitive specification for the electrical, physical, performance and nomenclature requirements for a 1.4V Zinc Air battery, NSN 6135-99-930-5607, BS EN 60086-2 designation PR70. This supplement does not invoke Product Conformity Certification.

2 WARNING

The Ministry of Defence (MOD), like its contractors, is subject to both United Kingdom and European laws regarding Health and Safety at Work, without exemption. All Defence Standards either directly or indirectly invoke the use of processes and procedures that could be injurious to health if adequate precautions are not taken. Defence Standards or their use in no way absolves users from complying with statutory and legal requirements relating to Health and Safety at Work.

DEF STAN 61-21 SUPPLEMENT 036/1

SECTION 1 GENERAL REQUIREMENTS

3 RELATED DOCUMENTS

3.1 For the purposes of this supplement all related documents are listed in Defence Standard 61-21.

3.2 Reference in this standard to any related document means in any invitation to tender or contract the edition and all amendments current at the date of such tender or contract unless a specific edition is indicated.

3.3 In consideration of **3.2** above, users shall be fully aware of the issue and amendment status of all related documents, particularly when forming part of an invitation to tender or contract. Responsibility for the correct application of standards rests with users.

3.4 DStan can advise regarding where related documents are obtained from. Requests for such information can be made to the DStan Helpdesk. How to contact the helpdesk is shown on the outside rear cover of Def Stans.

4 DEFINITIONS

Def Stan 61-21 definitions shall apply.

5 ABBREVIATIONS

Def Stan 61-21 abbreviations shall apply.

SECTION 2 ELECTRICAL CHARACTERISTICS

6 ELECTROCHEMICAL SYSTEM

The electrochemical system shall be defined by BS EN 60086-1: system designation P.

7 NOMINAL AND OFF-LOAD VOLTAGE

The nominal and off-load voltage shall be defined by BS EN 60086-1: system designation P.

DEF STAN 61-21 SUPPLEMENT 036/1

SECTION 3 PHYSICAL CHARACTERISTICS

8 DIMENSIONS

The dimensions of the battery will be in accordance with BS EN 60086-2 designation PR70.

9 MARKING

Marking shall be in accordance with BS EN 60086-1.

SECTION 4 PERFORMANCE REQUIREMENTS

10 DISCHARGE REQUIREMENTS

When subjected to a continuous discharge load of $3K\Omega \pm 0.5\%$ to an end-point of 1.1V the batteries shall meet the duration requirements given in **Table 1**

Prior to undertaking a discharge test, the batteries shall be pre-conditioned at the test temperature for a minimum of 24 hours.

A period of at least 10 minutes shall elapse between activation and commencement of electrical measurement.

Table 1 Discharge Duration Requirements		
Pre-Discharge Test (and discharge regime)	Supplement Clause Reference	Minimum Discharge Duration (Hours)
		Discharge Temperature
		$+20 \pm 2^{\circ}\text{C}$
Immediate Discharge	10	140
52 Weeks Temperate Storage	11.2	130
260 Weeks Temperate Storage	11.2	120

11 STORAGE REQUIREMENTS

11.1 Examination During Storage

At the start, and on completion of each storage test, the off-load voltage test (**clause 7**) shall be carried out, and the batteries examined. Any battery showing signs of leakage, corrosion or distortion shall be deemed to have failed.

11.2 Temperate Storage

Batteries shall be stored in an ambient temperature of $20 \pm 5^{\circ}\text{C}$ and a relative humidity between 45% and 75% for the specified duration.

DEF STAN 61-21 SUPPLEMENT 036/1

SECTION 5 MARKING REQUIREMENTS

12 GENERAL REQUIREMENTS

Commercial product markings are acceptable provided they are in accordance with **clause 9**.

SECTION 6 PACKAGING AND LABELLING REQUIREMENTS

13 GENERAL REQUIREMENTS

In addition to the packaging requirements stated in the contract, all levels of packaging shall include:

- a.** The battery NATO Stock number.
- b.** The date of manufacture.
- c.** The battery shelf life in the format “NOT TO BE STORED BEYOND *MM,YY*” which shall be 5 Years from the date of cell/battery manufacture.

The product shall be packed to enable transportation by all modes (land, sea and air).

Contract Requirements

When Defence Standards are incorporated into contracts users are responsible for their correct application and for complying with contractual and statutory requirements. Compliance with a Defence Standard does not in itself confer immunity from legal obligations.

Revision of Defence Standards

Defence Standards are revised as necessary by up issue or amendment. It is important that users of Defence Standards should ascertain that they are in possession of the latest issue or amendment. Information on all Defence Standards is contained in Def Stan 00-00 Standards for Defence Part 3 , Index of Standards for Defence Procurement Section 4 'Index of Defence Standards and Defence Specifications' published annually and supplemented regularly by Standards in Defence News (SID News). Any person who, when making use of a Defence Standard encounters an inaccuracy or ambiguity is requested to notify the Directorate of Standardization (DStan) without delay in order that the matter may be investigated and appropriate action taken.
