

TELEPHONE, HAND, S I, NO 4A (AUST)

DATA SUMMARY

1. The item is a lightweight assembly for use with field communications equipment, designed to be physically as small as possible, consistent with variations in size of the heads.

2. The body of the hand receiver is fitted at one end with a standard lightweight electro-magnetic receiver EM No 1 (green body with white stripe across face) and at the other end with a standard lightweight carbon microphone inset No 1 (red body with black stripe across face). A pressel switch is provided.
